

192(8): Corrigendum, Final $n(r)$ Function for
a precessing Ellipse

This is:

$$n(r) = \frac{\frac{1}{b^2} - \left(\frac{xe}{d}\right)^2 (1 - \cos^2(x\theta))}{\frac{1}{a^2} + \frac{1}{r^2}}$$
$$= \frac{\frac{1}{b^2} - \left(\frac{xe}{d}\right)^2 \left(1 - \frac{1}{e^2} \left(\frac{d}{r} - 1\right)^2\right)}{\frac{1}{a^2} + \frac{1}{r^2}}$$
